

SATHWIKA THATIPARTHI

STUDENT

About Me

Computer Science undergraduate with solid theoretical foundation through personal and team-based projects. I'm passionate about building practical, user focused solutions and eager to gain deeper research experience in a real-world setup environment. Seeking opportunities to develop skills in software development and applied research

Projects

Alumni Tracking System

NAF - EPICS UTD

I'm an EPICS student at UTD and through this I've got the opportunity to work on NAFs' Alumni Tracking System.

- Created a website NAF could use to get a list of names and contact information for alumni

AdvisorAI

Personal Project

Academic Advising AI chatBOT which helps users generate a 4-year degree plan and helps with prerequisite analysis.

- Python for back-end development
- Streamlit for front-end development

Netflix-Style Personal Portfolio

Personal Project

Created a Netflix themed portolio to showcase my projects and hobbies in an engaging way

- Java Script for backend development
- HTML/CSS for frontend

Education

University of Texas at Dallas

Computer Science

- Relevant Coursework:
 - Data Structures and Algorithms
 - Artificial Intelligence
 - Software Engineering
 - Database Systems
